Defining the Science of Occupational and Environmental Health[®]

February 1, 2016

David A. Pavlich
Association Manager
Synthetic Amorphous Silica and Silicate Industry (SASSI)
116 Countryside Drive
South Russell, OH 44022

Dear Mr. Pavlich,

Calcium silicate, synthetic nonfibrous

The ACGIH[®] Board of Directors voted to withdraw the previous recommendation for Calcium silicate, synthetic nonfibrous. Your comments were considered by the TLVs[®] for Chemical Substances Committee before the recommendation for withdraw was made to the Board of Directors.

Calcium silicate, naturally occurring as Wollastonite

The ACGIH[®] Board of Directors voted to adopt Calcium silicate, naturally occurring as Wollastonite. The adopted recommendation is a TLV[®]-TWA of 1 mg/m³, Inhalable particulate matter, containing no asbestos and <1% crystalline silica with an A4, Not Classifiable as a Human Carcinogen, carcinogenicity notation. Your comments were considered by the TLVs[®] for Chemical Substances Committee before the recommendation for adoption was made to the Board of Directors.

When the adopted 2016 *Documentation* becomes available to the public, around mid-March, we will send you a copy for your personal use and review. This *Documentation* will also be made available to the public on the ACGIH[®] website at <http://www.acgih.org/store>.

As general practice, ACGIH[®] reviews all submissions regarding chemical substances and physical agents on the Under Study list, as well as NICs or Notice of Intent to Establish (NIEs), or currently adopted TLV(s)[®] and BEI(s)[®]. The comment period for an NIC or NIE draft *Documentation* and its respective TLV(s)[®], notation(s) or BEI(s)[®] will be limited to a firm four-month period, running from February 1 to May 31 of each year.

ACGIH[®] has structured the comment period to ensure that all comments are received in time for full consideration by the appropriate committee before its fall meeting. Because of the time required to properly review, evaluate, and consider comments during the fall meetings, any comments received after the deadline of May 31 may not be considered in that year's deliberations regarding the outcome for possible adoption of a NIC or NIE. All comments received after the May 31 deadline will be fully considered in the following year. All draft *Documentation* will be available for public review and comment during the full four-month period.

When submitting comments, ACGIH[®] requires that the submission be limited to 10 pages in length, including an executive summary. The submission may include appendices of citable material not included as part of the 10-page limit. It would be very beneficial to structure comments as follows:

1. **Executive Summary** – Provide an Executive Summary with a limit of 250 words.
2. **List of Recommendations/Actions** – Identify, in a vertical list, specific recommendations/actions that are being requested.
3. **Rationale** – Provide specific rationale to justify each recommendation/action requested.
4. **Citable Material** – Provide citable material to substantiate the rationale. Citable material is data that is available in the public domain or that we have written authorization from the owner to use. Should submitted material include unpublished data, it is important for this written authorization to accompany the submission and it must grant ACGIH[®] permission to use, cite, and release the data. Please refer to our website at <http://www.acgih.org/TLV/DevProcess.htm> for instructions on how to complete this permission statement

For complete information regarding the TLV[®]/BEI[®] Development Process, please visit our website (<http://www.acgih.org>).

Thank you for your participation in the TLV[®]/BEI[®] Development Process.

Regards,

Ryan Peltier, REHS/RS
Science and Education Manager
